

FUNCTIONAL STATEMENT
OFFICE OF REPORTS AND ESTIMATES
CENTRAL INTELLIGENCE AGENCY

III. Plans and Policy Staff

A. Requirements Division.

1. Mission: To insure that available collection and source exploitation facilities will be given continuous adequate and timely guidance in providing data responsive to requirements for intelligence production in support of the national security.
2. Responsibilities: In the fulfillment of its mission the Requirements Division will:
 - (a) Process and review the formulation of ORE requirements for intelligence data obtainable from all sources, coordinating this action with the IAC agencies when appropriate, and prepare and arrange for the issuance of implementing directives to OCD/CIA.
 - (b) ~~Receive~~ ¹¹⁰² and ~~Review~~ ^R IAC agency requirements addressed to CIA for collection action, and consolidate therewith such additional ORE requirements as may be appropriate.
 - (c) Maintain direct liaison with the intelligence collection liaison officers of CIA in order to assure that:
 - (i) ORE will have adequate knowledge of the collection capabilities and intelligence data potential of all available sources; and
 - (ii) ORE guidance is at all times consistent with opportunities for collection action, and exploitation of available sources.
 - (d) Coordinate and review assessments of adequacy, accuracy and timeliness of available intelligence information coverage within ORE and, when appropriate, by the IAC agencies, and prepare and arrange for the issuance of action papers required.

- 2 -

to properly advise agencies concerned and provide recommendations for removal of deficiencies.

(e) Advise and assist ORE researchers on all problems related to the formulation and fulfillment of requirements for intelligence data from all available sources.

(f) Prepare and, where appropriate, coordinate initial and informal IAC agency participation in the formulation of ORE recommended CIA plans, policies, procedures, and implementing directives designed to facilitate fulfillment of national requirements for intelligence data.
